	⊖ Needs Work	✓ Meets Expectations	✓ Exceeds Expectations
Created folder structure	• Project does not have a stylesheet inside a CSS folder.	• Project contains a stylesheet inside of a CSS folder.	• N/A

Mobile-first design	• No viewport meta tag in the head of the HTML.
	
	• The responsive design is *not* using a true mobile-first approach, for example by relying predominantly on `max-width` properties in the media-queries.
	
	• Media queries are not set to:
	  ○ 768px for tablet screen sizes
	  ○ 1024px for desktop screen sizes
		• The HTML file includes the viewport meta tag in the head of the document.
		
		• A mobile-first approach is utilized using `min-width` properties for media queries.
		
		• Media queries are in place to match the screen sizes for:
		  ○ tablets at 768px
		  ○ desktop screens at 1024px
			• N/A

Design and layout	• Does not match the layout of at least one of the mockups.
	
	• A google font has not been added to the project or is not working correctly.
		• Matches layout of mockups. General spacing and arrangement of the elements matches the design of the mockups for:
		  ○ Mobile
		  ○ Tablet
		  ○ Desktop
		
		• A Google Font is being used for the text.
			• At least TWO of the following additional styling enhancements have been added to the portfolio:
			  ○ A new background color or image for the navigation and/or main sections of the site.
			  ○ The color of at least one piece of text has been changed.
			  ○ One additional google font has been added, and is being used on the page.
			  ○ Any additional styling for links has been added.

Navigation and sections	• Links in the navigation bar do not take you to the relevant section.	• The navigation menu items have working links to the different sections that use ID's to link to relevant anchor tags.	• The `<nav>` tag is being used for the navigation bar. • Additional section has been added to the page, such as a skills section, and a working link to the new section has been added to the navigation bar using an ID to link to anchor tag.
Valid code	• When checked with a validator, the HTML and/or CSS code has errors that are not on the list of exceptions.	• HTML and CSS code passes validation and/or only includes errors that are on the list of exceptions.	• N/A
